

Study Group Former
CS 441

System Requirements

Software for development: Qt Creator 5

When running on mac OS X, Qt Creator requires Xcode to be installed

OS:

Linux, Microsoft Windows and Mac OS X operating systems 64-bit and 32-bit instruction set architectures.

Additional:

OpenSSL (version 0.9.7 or later), OS X comes with this preinstalled. Windows users are required to include OpenSSL .dlls in the executable directory. (ssleay32.dll, libeay32.dll)

Hardware requirements:

Study Group Former uses minimal hardware requirements, it should run on any system with a processor manufactured in the last 7 years
